Wide Area Networks and Networking Services and Security - Revised

This course will first introduce you to the functions that can be provided by network services. You will study the installation and function of the Dynamic Host Configuration Protocol (DHCP) and the 4 stages it goes through when assigning an IP address to the client. The course will then discuss Automatic Private IP Addressing (APIPA), Routing and Remote Access Service (RRAS), IP security (IPSec), Domain Name System (DNS), and Windows Internet Name Service (WINS).

Modules Studied

Module 1: Working with Networking Services

Module 2: Understanding Wide Area Networks

Module 3: Course assessment
